AC VFDs: from small, simple component drives to sophisticated high performance vector drives

OCS—PLC and operator interface control system with high-resolution graphical capabilities

Circuit breakers, terminal blocks, wire duct, disconnect switches, cord grips, distribution blocks

Low cost variable speed motor control (ac and dc)

Single source for industrial control components: Sensors, switches, controls, safety, enclosures, energy management

Manual motor starters and protectors, disconnect switches, IEC contactors and overload relays, limit switches, foot switches, digital metering

Terminal blocks, PCB terminals, cord grips, ferrules/crimping, cable trays

HIM and Operator Interface products, including touch-screen terminals to interface with over 80 families of PLCs

Transformers, single phase, three phase, general purpose and custom

Power quality products, line reactors

Speed, motion and vibration monitoring, encoders

Comprehensive motor control line including contactors, motor protection, disconnect switches, pilot devices and terminals

Non-metallic, NEMA 4X industrial enclosures

Variable speed ac drives, including wash-down

Relays, timers and interface modules

HMI and PLC, integrated into a single, powerful device.

Standard and custom electrical and electronic enclosures, modular cabinets, consoles, racks, PC cabinets, wire ways, climate control products, filter fans, heat exchangers, air conditioners

Sensors for current, temperature, humidity, air quality, data acquisition

Data communication equipment

Quality Components & Expertise. A Complete Solution.
